

Why Host an Immersion Experience?

Schedule a no cost, no commitment session in your office to **TEST DRIVE** how Microsoft's currently available project collaboration tools – both on the desktop and in the cloud – can seamlessly work together to help your organization prioritize, select, plan, manage, collaborate and report on your projects and non-project work.

Sessions are led by a certified Microsoft Partner and designed to be interactive, experiential and fun. Your Customer Immersion Experience includes:

- Turnkey on-site setup of 10 tablets/4 smartphones
- Fully functional, cloud-based software environment
- One or more 2 to 3 hour sessions for up to 10 participants per session
- Additional resources to support your further evaluation

You provide a conference room, internet access and users!

How to participate:

Email or call the following contact to schedule a personalized Microsoft Project Collaboration Immersion Experience for your organization:

Darwyn Azzinaro, BlumShapiro

Email: dazzinaro@blumshapiro.com

Phone: 860.570.6354

Let's *imagine* doing.

Customer Immersion Experience

Experience End-to-End Project Collaboration

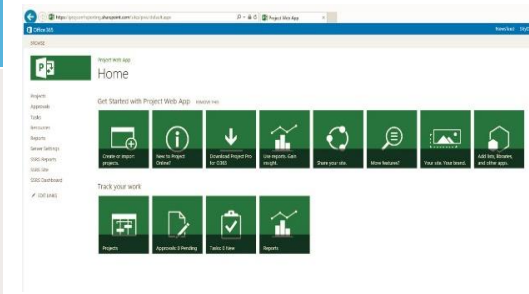

Project Initiation. Analysis and Project Prioritization. Capacity Planning. Project Team Collaboration. Reporting. Whatever PPM challenge your organization is facing, Microsoft has a solution. Why not experience these powerful products for yourself?

The Microsoft Customer Immersion Experience (CIE) session is a **hands-on** introduction to Microsoft's familiar, integrated and role-based project collaboration and management tools. A true-to-life user experience, CIE takes you through "a day in the life" of your organization with collaboration capabilities that are available today.

During a CIE, you will have a chance to experience multiple facets of Microsoft's project collaboration software, including:

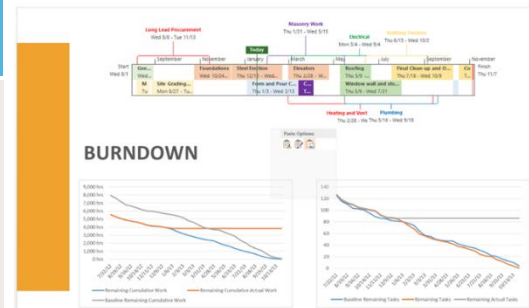

Collaboration

See how project sites, real-time conversations and IM, and simple web access can enable Team Members to interact quickly and easily with familiar tools.

Insight

View how Senior Mgmt. gain increased transparency through dashboards, reports and powerful business intelligence.

Flexibility

Discover how templates and role-based views enable all users, both inside and outside your department.

On Any Device

Explore how your teams and project stakeholders can complete work from virtually anywhere on almost any device.
