

Is Your Business Realizing Its Full Potential?

Whether you have challenges managing the mountains of information your organization produces every month, are looking for ways to improve the collaboration and productivity of your employees or gain better insight into your business, BlumShapiro and SharePoint 2010 can help. The SharePoint 2010 business collaboration platform can provide value to businesses of any size or industry.

SharePoint Highlights:

Sites

Sites provide a single location to bring people together to share and access information, data and expertise. Sites highlights include:

- The ability to access information anywhere — work, home or on a mobile device
 - Improve ROI/lowers total cost of ownership via platform consolidation
-

Communities

Communities empower people to work together in ways that are most effective for them. They allow people to collaborate in groups, share knowledge and ideas and connect with colleagues. Communities highlights include:

- Enable businesses to build communities with employees, partners and customers
 - Remove information barriers within your organization
-

Content

Content allows employees to create, upload and access documents, rich media and other files more easily and efficiently using familiar office tools while maintaining legal compliance. Content highlights include:

- Ensures information is managed in accordance with policy and regulation
 - Provides your employees with co-authoring, meta data-driven navigation and search-refining capabilities to turn information into action
-

Search

Search enables employees to find, explore and connect with the right information and the people with the right skill sets. Search highlights include:

- Improves search experience with visual best bets, search refinement panels and thumbnail previews
 - Finds people in your organization with the skills to succeed
-

Composites

Composites help reduce the number of applications that your employees need to access while also reducing development time on new solutions. Composites highlights include:

- Allow the creation of solutions without writing code
 - Reads and writes data from Line of Business (LOB) applications
 - Reduce the number of applications your employees need to access
-

Insights

Insights allow employees to analyze and share information to see the big picture or help discover the most granular details of your organization's data. Insights highlights include:

- Provide self-service capabilities to decision-makers to create dashboards, scorecards, KPIs and reports
 - Allow employees to use familiar tools like Excel to create and publish reports
-

BlumShapiro's SharePoint Services

BlumShapiro has experience implementing SharePoint in companies of all sizes and across a variety of industries including insurance, finance, higher education, advertising, manufacturing and banking. As a Microsoft Partner, our technology consulting group has developed a proven track record for helping organizations large and small tackle business challenges through the effective use of Microsoft technologies.
